I've taken many trainings in the beauty industry and came across Lala's social media. I had never seen any results like hers. Her results are what drove me to take her training. I flew from the east coast to Texas. I wish there was a Lala in my area with the proven results for me to personally have the services. Lala's training was so much more than what I could of even imagined. The amount of information and hands on opportunity was like nothing I had ever had in any training. She was so in-depth. The manuals were like a textbook. Her guidance was so meticulous. Don't waste your money going to train with someone else. Lala is it. Don't waste your money on any other service provider. Lala is it. I am forever grateful for the experience and knowledge I gained. Lala was so down to earth and fun.
Thank you Lala for a once in a life time training 💕

Lala's class was such a life change! I was scared to make a career change specially coming from the medical field and being a new mom, but she was always so uplifting and inspirational from day one! She didn't sugar coat things either. It's hard starting your own business and even harder in a field that hasn't been around for long. She shares her knowledge and the building blocks for your business, all you have to do is start building, and put in the work to see yourself grow! When I first started, I'm pretty sure I constantly blew up her phone and asked her a million questions but she was always nice and answered them. Even now, almost a year later I know I can reach out to her for guidance. Flying out to El Paso from Georgia was worth it 🫶
